To Whom it may concern,
I writing to express my disagreement with the NAB's petition (04-160) to have XM Radio be told what it can and cannot send over the airwaves. We PAY for this service and if something we want is available and they are willing to broadcast it, we should get it. As an over-the-road truck driver it is great to be able to have access to information regarding the areas I'm driving in when I need it. I love my XM Radio. I enjoy the variety and quality of programming and signal strength that XM Radio offers. While driving in the past, I would get to listen to a station for about 30 minutes if I was lucky. What a pain in the ass! Always having to switch to another station, again, if I was lucky to find one.

That is why I quit listening to radio years ago. You know they are on to something when car makers offer their cars as XM ready. The NAB has enjoyed it's dominance and doesn't like new kids horning in on their game. You know that a company is making in-roads when they have the government on their backs.

well, that is what makes America great! The ability to give something to the public that they want. What determines our economy is supply and demand. Rather than cry about the fact that satellite radio has caught them unawares, they should come up with something to compete. You need to step up your game or get out! America is about EQUALITY! America is about the little guy making the most of his chance. This is a democratic not a socialistic state we have here.

I'm a 36-year-old conservative white male father of 7.....yes from ONE woman.
Thanks for reading this.
